Pros:

- Smooth gameplay *Very important
- Well optimized game *Very important
- Unlimited FPS *Very important
- Nice graphics
- Different gameplay style - alternate between motos while racing
- Many challenges to do
- Many motos to buy
- Many tournaments and gold medals to get
- Many achievements
- Customizable keyboard layout
- Arcade

Cons:

- Many times game crashes when loading the main menu
- Sometimes game performance goes down and need to restart the game to fix
- Can't customize gamepad layout, however the default layout is good
- Can't open Steam Overlay, however achievements and chat messages are shown
- Soundtrack of 1 music, but you can disable it
- Game is too easy and bots doesn't alternate between motos. i was there when game just launched , right that minute... :D but since then i aint play yet. Cool game, interesting game play. A little easy I thought. Overall a fun, and entertaining little game. 8/10. This game is like a faster paced towerfall except with demons and shotguns. The gameplay is really fun and addicting but it lacks in playable levels, guns, and characters. It was made with Unity. Hopefully the devs make this game bigger since it really is a hell-of-a-lot of fun. Oh, and its funny as hell too. The angel is the funniest and the commentator sounds like the dude from honest trailers: "Frag em all." All in all, if you want a funny game the play with your mates, this could be a good hour spent but if you're looking for hours of gameplay, look elsewhere. Until they add more to the game like interesting levels, a level editor, more characters, more guns, more traps, more awesomeness, I cannot fully say that this game is amazing enough to warrant it a perfect score. I give it a 6-7/10.

Edit 07/07/2018

After two years of owning this game. Nothing has changed. They should have included a basic workshop mode. It would have made the game leaps and bounds better. This is why games like Towerfall, Stickfight, and Duck game are way better. Could have been amazing but whatever.

Save your money and pass this up at full price. Only buy it on sale. You'll get like 1-2 hours out of this game before it gets old. 1 gun on the same types of maps = boring.. right now i am speechless and happy that all

Game advertises controller support. Does not support controllers. Use an Xbox One Controller which every other steam game is fine with, except this game. Am dissappointed with false advertising of controller support and no other way to play the game.

UPDATE 01/27/19: After further diagnosing I was able to resolve this by DISABLING XBOX controller support in general settings and enabling general/STEAM controller support. This is awkward because I have to switch it back on after finishing for other games to work properly, but it did resolve the original issue.. It's a good game, but it dearly needs a way to control the ship with a mouse. As it is, using keyboard for ship controls is just painful.. The performance problems are simply unacceptable, they make the game unplayable.
Really sad because I love this game franchise

I5 5500

Gtx 1050

12 gb ram ddr4. I am most pleased with this great looking locomotive, I found it easy to drive after reading the manual, with regards to the brakes.

The only two drawbacks for me are:

1. The overly loud ejector noise when releasing the brakes.
2. The bright white coloured wheel treads, are too wide and appear to partially extend to the side of the tyres. The wheels on the tender are a more realistic colour IMO.

Taking all that into consideration I would still give this locomotive a well deserved 9 out of 10.. its fun this game have more maps now can jump and excellent graphics but just white and pink colors .BEST. Cute, short and free game for toddlers.. The game is fun.

BUY IT!. please take off the tape! tapes are now off :-) nice pics. RunGunJumpGun hurts me because it loves me.
